The Ultimate Smart Lighting Experience

HAVEN

LIGHTING

Haven Lighting is driven to provide the ultimate smart lighting experience. Our vertical integration from product concept, development, engineering, software, apps, cloud and more give us an exceptional platform that enables us to provide a seamless user experience. While others start with fixture design and standard lighting formats, we start with the core product functionality. This allows us to create the highest lumen, smartest lighting systems in the industry.

Our collections feature unique, LED products, with unparalleled brightness, vivid color, and white temperature adjustments. Whether you want to highlight the architectural beauty of your home, illuminate the pathways in your front yard, or accent a new kitchen back splash, Haven has a lighting collection for you. Our wireless control systems can be easily integrated with home automation devices, as well, allowing you complete flexibility while adding style and sophistication to any living space.

Flexibility and Control

With Haven Lighting, you're in control. Celebrate any occasion with vivid colors and adjust the brightness of your lights from your smart phone. Schedule and control your LED lights from anywhere, no timers or light sensors needed. You'll fall in love with all you can do with your Haven Lighting systems.

Easy to Use

Our products require no complicated prep work. Simply touch a button to create the perfect atmosphere with color and brightness. With Haven Lighting, you'll spend less time preparing for entertaining and more time enjoying the party with friends and family.

Unparalleled Support

Our remote monitoring can identify issues before they become a problem. Haven Lighting's system performance and cloud-based support will reduce the need for on-site visits and provide solutions in real time. In addition, you'll have direct access to support from the product manufacturer and product designers, all based in the USA.

Lighting for Any Occasion

Our landscape lighting is one of the most versatile outdoor lighting systems on the market today. You can choose to illuminate your walkways with brilliant white light or highlight your exterior features with a range of radiant color options. Either way, you'll have complete control of brightness and color with our simple Haven Smartphone App.

Through our user friendly app, you will also be able to set up calendar based scheduling. This means that you can program your house to light up red and green from December 1st through December 31st, and it will automatically switch to that set up in December, not only this year, but every year going forward.

Our Inspiration

We are inspired by the underdogs in the fight:

The daring entrepreneurs, the passionate advocates for change, the men and women who battle every day, and those who gave all, to empower those advocates—and all of us—with the freedom to speak.

The cancer fighters, the disadvantaged kids struggling to overcome unimaginable odds.

The supporters that give hope, the first-time 5k runner crossing the finish line with pure, heartfelt determination to support a friend.

The courageous ones willing to stand in the face of opposition for what they believe.

We may not always understand. We may not always hold the same beliefs. But we are always inspired by your determination, your grit, and your drive for success. We love your passion.

Your fight inspires our fight.
